

Test Plan: Strava Integration - 2nd Exploratory / 3rd Party Disconnections

This is the test criteria for disconnecting the Strava Integration, to follow the main connection test cases for the feature (Applause

link: [Sign in to Applause](#))

Prerequisite test criteria from previous test cases:

- Test case 1 & 2: Access Connection Screen (from Sessions Home Page or Account Page)
- Test case 3 > 6: Connect to Strava and sync sessions.

Disconnect test cases:

Test Case 11: Disconnect Strava Account

Preconditions: Strava is connected and listed under "Active Connections".

Steps:

1. Open the third-party connections screen.
2. Locate Strava under the "Active Connections" section.
3. Tap the "Disconnect" button next to Strava.

Expected Result: The list view is replaced by a disconnection view with a spinner animation, then returns to the list view on success. Strava appears back in the "Apps & Devices" section.

Test Case 12: Sessions Remain After Disconnection

Preconditions: Strava is connected and has synced sessions visible in the Sessions feed.

Steps:

1. Disconnect Strava using the disconnect button (see Test Case 11).
2. Navigate to the Sessions feed.
3. Check for previously synced Strava sessions.

Expected Result: Previously synced Strava sessions remain visible in the Sessions feed and are still accessible.

Test Case 13: Immediate Reconnection After Disconnect

Preconditions: Strava was just disconnected (see Test Case 11).

Steps:

1. After successful disconnection, immediately tap Strava under "Apps & Devices".
2. Complete the authentication flow.

Expected Result: Strava can be reconnected immediately and appears back under "Active Connections".

Test Case 14: No 'Active Connections' section displays when disconnected

Preconditions: No third-party apps are connected.

Steps:

1. Open the third-party connections screen.

Expected Result: Only the "Apps & Devices" section is visible. No "Active Connections" section is shown.

Test Case 15: Multiple Active Connections Display

Preconditions: Multiple third-party apps are connected (if applicable).

Steps:

1. Open the third-party connections screen.
2. Observe the "Active Connections" section.

Expected Result: All connected apps are listed under "Active Connections" with individual disconnect buttons.

Test Case 16: Disconnect Network Error Handling

Preconditions: Strava is connected, there are network connectivity issues e.g. no network.

Steps:

1. Navigate to the connections view.
2. Simulate network connectivity issues / turn wifi off.
3. Press the 'Disconnect' button to disconnect Strava.
4. Observe the behavior.

Expected Result: Appropriate error handling is displayed, and the user remains in the list view without disconnection occurring.
